

C & W Auto Body

Description:

Our 40,000 square foot facility is home to an array of sophisticated equipment and to a dedicated auto paint department.

Equipment includes -

Our Continental four and six tower unibody straightening equipment restores your vehicle to manufacturer specifications. Your car or truck won't be right if the frame isn't right after a collision.

Our auto paint booth, a Garmat Downdraft with baking capacity, was custom designed to manufacturers' specifications. We can't imagine an auto body shop without it.

Paint mixing and color matching: it's not just auto body paint to us - it's your vehicle's calling card. For the best possible finish and color match, two separate and independent mixing systems are combined to offer the best manufacturer-grade paint and finishes available.

Above Ground Lifts save you time in the estimate process because a thorough underside inspection can be performed initially.

Clean air evacuation and recharging A/C systems.

Manufacturer computerized testing equipment necessary to service today's computerized vehicles. Engine and transmission lifts.

And much more!

Great Services

Easy car rental Competitive rates and easy access.

Detailing and Wash We detail your vehicle before delivery back to you.
