

Imperial Auto Body

Description:

Imperial Auto Body thrives to keep customers satisfied. With two locations, both shops stand strong and ready to guide our customers through the entire process: from rental car reservations, insurance relations, and to keeping you updated throughout the entire repair process of the vehicle. We realize the importance of being informed on our own vehicles and we will do the same for our clients.

During the repair process, all repairs will follow vehicle manufacturer's specifications. We give our customers what they want, and that means repairing their collision-damaged vehicle properly in the quickest, safest, and most skillful-manner possible. An efficient repair not only corrects all the damage, but it maintains the long-term durability of the vehicle. This will keep the vehicle handling properly, in addition to the restoration of the appearance and operation of all safety systems, such as like airbags and anti-lock brakes.

We maintain memberships for all manufacturer's web pages associated to collision repair to ensure we are connected with any changes made to a vehicle's design that may change the way it should be repaired. All of our technicians are trained through the Inter-Industry Conference on Auto Collision Repair (I-Car).
